Time for Finals! Some Self-Care Tips 🦋

☼ Summer Session ☀

It's not to late to enroll in summer session courses! Both lower and upper division courses are still available to enroll in. It's much easier to find space in summer courses, and while the teaching period is shorter, you'll likely be in smaller classes which can allow you to better connect with professors and classmates. All summer courses will be taught remotely, online.

Getting Involved in Your Major Panel Briefing

UCSC Psychology Department

Getting Involved In Your Major Panel

On May 19th, 2021, the Psychology Department hosted a panel for undergraduate students to discuss the ways Cognitive Science and Psychology students can engage with their major through: field study, undergraduate research, and by joining Psychology & Cognitive Science organizations! The field study panel consisted of Kha Hua and Ethan Johnson. The undergraduate research panel consisted of Michael Sack and Kelli Haupage.

Tips from the Field Study Panel:

Research the place you are applying to and make sure to utilize the Career Center to help with creating resumes and cover letters!

Tips from the Undergraduate Research Panel:

Attend office hours! Professors and TA's love talking about their research and it is a great way to connect with them.

UCSC Psychology & Cognitive Science Organizations:

UCSC Psi Chi International Honor Society (psichiucsc@gmail.com)
UCSC Cognitive Science Student Association (ucsc.cogsci@gmail.com)
