Psychology
The scientific study of the human mind and its functions, esp. those affecting behavior in a given context. Our department is organized into three research areas: cognitive, developmental, and social psychology.

Cognitive Science
A branch of psychology focused on achieving a scientific understanding of how human cognition works and how cognition is possible, its subject matter encompasses cognitive functions (such as memory and perception), the structure and use of human language, the evolution of the mind, animal cognition, artificial intelligence, and more.

Beyond the Classroom

**Psyc 191A - Instructional Assistant**
Application: Statement, transcripts, letter of recommendation

**Psyc 193 - Field Study**
Application: Informational Meeting

**Psyc 194 - Research**
Application: Website or Bulletin Board outside of Psyc Dept

**Psyc 195 - Senior Thesis**
Application: Forms in the Psyc Dept

**Psyc 199 - Independent Study**
* Students help plan and execute Psych 1, Intro to Psychology, under the guidance of faculty and graduate students.
* They are responsible for running a section, attending a weekly meeting regarding teaching techniques/course material, and attending all lectures.
Psychology Field Study is an academic internship program offered to psychology majors to integrate current and prior coursework with community involvement. For a minimum of two quarters, students devote ten hours a week to a community based internship.

Research allows you to work as an undergraduate research assistant in current faculty research projects. This is an excellent opportunity to develop your research skills and to work with faculty personally.
Senior thesis gives you an opportunity to directly work with a faculty member and/or graduate student and conduct your own research like a first year graduate student.

A great way to prepare yourself for what you will be doing in graduate school and a possibility of getting your research published!!
