Psychology Department
273 Social Sciences 2

 STEPS TO ENROLLING IN
 PSYCHOLOGY 194A, B AND C

• Go to the Psychology 194 Advanced Research in Special Topics bulletin board outside the Psychology Department Office, 273 Social Sciences II, before or during the enrollment filing period.

• Read the research project descriptions carefully and take copies of those that match your interests and qualifications.

• Pick up a Petition for Psychology 194 Advanced Research in Special Topics from the slot located next to the bulletin board.

• Contact the Faculty Research Supervisor and arrange an initial meeting to discuss your possible work on the project.

• Take the petition to this meeting. During this meeting you and the Faculty Research Supervisor will decide if the project is appropriate for you. If it is, complete the petition and have the Faculty Research Supervisor sign it.

• Take your completed, signed petition to the Psychology Department Office to obtain a call number for your enrollment. A petition must be completed, signed and filed with the Psychology Department each quarter in order for you to receive credit.

Note: Psychology 194A, B and C each have a designated Faculty Sponsor whose name will appear on your enrollment verification and narrative evaluation forms. This is for administrative purposes only and does not necessarily mean you will have contact with that person during the quarter. You will be working directly with, and will be evaluated by, the Faculty Research Supervisor who signs your petition and his/her name will appear in the body of your narrative evaluation.

If you have questions on any aspect of the Psychology 194 series, please talk to the Psychology Department Receptionist, 273 Social Sciences 2, 459-2002.

PSYCHOLOGY 194
ADVANCED RESEARCH IN SPECIAL TOPICS

This is a series of courses designed to provide students with research training and the opportunity to work as undergraduate research assistants on various faculty research projects:

194A Advanced Developmental Research
194B Advanced Experimental Research
194C Advanced Social Research

These courses are not sequential. Each is 5 units and may be repeated for credit.

Students usually meet regularly in groups with an individual faculty research supervisor or graduate research assistant who guides them in their research activities, discusses their progress on the project and writes a quarterly narrative evaluation. Students are involved in activities such as reviewing literature, designing experiments, preparing experimental materials, scoring, coding and analyzing data, and producing an APA style research report. The specific content of the work and length of student commitment varies with each project; however, students should expect to spend at least 15 hours per week on the course each quarter. Evaluations are based on students' participation in the research and their research reports.

Prerequisites: approved petition filed with the Psychology Department Office each quarter.

See Steps to Enrolling in Psychology 194A, B and C on the other side of this page.

If you have questions on any aspect of the Psychology 194 series, please contact the Psychology Department Receptionist, 273 Social Sciences 2, 459-2002.
